Backend

PHP 8, Node.js, PHP Slim 4,
PostgreSQL, MySQL, Docker,
Bash, API development, n8n

Frontend

React, Vue, TypeScript, ES6,
Redux, Bootstrap 5, Webpack

AI

LangChain, LangSmith, Ollama,
OpenAI API, Anthropic API

EXPERIENCE

Mar 2023 – Present

Fullstack Developer — AO Bars Group (Kazan, Russia)

Business applications for government-related organisations. Maintained and extended legacy codebases with heavy databases and SQL queries past a thousand lines. Adopted .NET 6 and Vue.js on the job; deepened expertise in Docker and PostgreSQL.

Aug 2020 – Mar 2022

Fullstack Developer — [Leading Internet Solutions](#) (Melbourne, Australia)

Refactored a framework-less PHP web application onto PHP Slim and React. Integrated Twilio and other third-party services. Reported directly to the founder in English and led the project independently, working asynchronously with decisions recorded in writing.

Apr 2013 – Mar 2022

Freelance Web Developer — UpWork

Promo websites with custom admin panels for web agencies worldwide. 32 completed jobs at an average rating of 4.92 / 5.00, holding “Top Rated” status — [see public UpWork profile and client feedback](#).

IMPORTANT – messages sent through UpWork will not reach me; the account was suspended in March 2022.

Nov 2011 – Apr 2013

Freelance Web Developer — fl.ru

Small promo websites without a backend, and Adobe Flash games.

OPEN SOURCE

Top contributor to [OpenAPITools/openapi-generator](#) — more than 50 merged pull requests.

Author of the PHP packages [OpenAPI Data Mocker](#) and [SMSGorod API Client](#).

Languages — Russian (native), English (C1 certified; certificate available on request).

Contracting — independent contractor with own legal entity; bank account in Kazakhstan accepts payments worldwide.

Remote work — async by default, wide overlap with European hours, able to shift earlier or later for US or Australian teams.

Availability — full-time only, open to offers, available within a few weeks of signing.
